**EXEMPLE:**

1. De creat o pagină Web ce va afișa secvența "oOo". Literele "o" mici sunt sub "O" mare , fiecare literă are o umbră, de mărimea unui "O" mare – 20 de puncte, dimensiunea literelor mici - 15 puncte , toate literele au culoarea verde(*vezi imaginea*).

```
<html>
<head>
<title>css lucrare 1</title>
</head>
<body bgcolor="white">
<div style="position:absolute;left:100;top:50;color:green;font-size:20pt;z-index:1;">O</div>
<div style="position:absolute;left:102;top:52;color:black;font-size:20pt;z-index:0;">O</div>
<div style="position:absolute;left:100;top:67;color:green;font-size:15pt;z-index:1;">oo</div>
<div style="position:absolute;left:102;top:69;color:black;font-size:15pt;z-index:0;">oo</div>
</body>
</html>
```

2. De creat o pagină Web ce va conține trei butoane pentru a schimba culoarea unui text (albastru, verde, roșu) ce se află în punctul cu coordonatele X = 200, Y = 200(*vezi imaginea*).

```
<html>
<head>
<meta charset="utf-8">
<title>css lucrare 2</title>
</head>
<body>
<div id="block" style="position:absolute;left:20px;top:50px;">
Textul, care își schimbă culoarea dinamic
</div>
<input type="button" id="btnRed" value="roșu" onclick="block.style.color='red'">
<input type="button" id="btnGreen" value="verde" onclick="block.style.color='green'">
<input type="button" id="btnBlue" value="albastru" onclick="block.style.color='blue'">
</body>
</html>
```

3. De creat o interfață pentru a schimba culoarea unui text și culoarea umbrei (*vezi imaginea*).

```html
<html>
<head>
<meta charset="utf-8">
<title>css lucrare 3</title>
<style>
div{
                            position:absolute;
                            left:120;
                            top:50;
                            color:red;
                            z-index:2;
                            font-size:30pt;
                            font-family:Impact;
}
div.shadow{
                            left:123;
                            top:53;
                            color:black;
                            z-index:1;
}
</style>
</head>
<body>
<div id="block">Hello World</div>
<div id="shadow" class="shadow">Hello World</div>
<table style="position:absolute;left:120;top:100;" border="1" bordercolor="gray" bgcolor="white"
cellspacing="1" cellpadding="0">
<tr><th bgcolor="white">parametri</th></tr><tr><td>
<table border="0" cellspacing="0" cellpadding="3" bgcolor="#efefef">
<tr><td>text</td><td>
<select onchange="block.style.color = this.options[this.selectedIndex].value">
                            <option value="white">alb</option>
                            <option value="red" selected>roșu</option>
                            <option value="green">verde</option>
                            <option value="blue">albastru</option>
                            <option value="yellow">galben</option>
                            <option value="cyan">turcoaz</option>
                            <option value="silver">argint</option>
                            <option value="gray">sur</option>
                            <option value="black">negru</option>
</select>
</td></tr>
<tr><td>umbra</td><td>
<select onchange="shadow.style.color = this.options[this.selectedIndex].value">
                            <option value="white">alb</option>
                            <option value="red" selected>roșu</option>
                            <option value="green">verde</option>
                            <option value="blue">albastru</option>
                            <option value="yellow">galben</option>
                            <option value="cyan">turcoaz</option>
                            <option value="silver">argint</option>
                            <option value="gray">sur</option>
                            <option value="black">negru</option>
</select>
</td></tr>
<tr><td>fundal</td><td>
<select onchange="body.style.background = this.options[this.selectedIndex].value">
                            <option value="white">alb</option>
                            <option value="red" selected>roșu</option>
                            <option value="green">verde</option>
                            <option value="blue">albastru</option>
                            <option value="yellow">galben</option>
                            <option value="cyan">turcoaz</option>
                            <option value="silver">argint</option>
                            <option value="gray">sur</option>
                            <option value="black">negru</option>
</select>
</td></tr>
</table>
</td></tr>
</table>
</body>
</html>
```
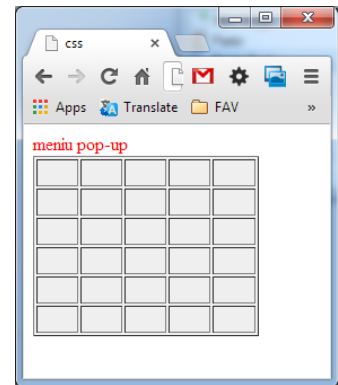

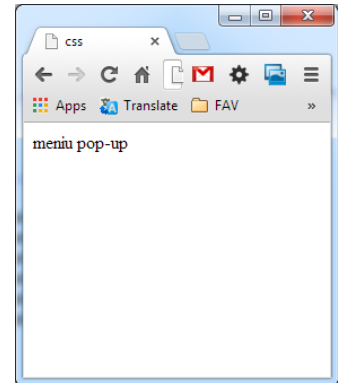

4. De creat o pagină Web cu un text, atunci cînd, cursorul mouse-ului trece deasupra textului, devine vizibil un strat(un tabel 5 x 6).

```html
<html>
<head>
<title>css lucrare 4</title>
</head>
<body>
<div style="width:200px" onmouseover="this.style.color='red'; menu.style.visibility='visible';"
onmouseout="this.style.color='black'">
meniu pop-up
</div>

<div id="menu" style="width:200px;visibility:hidden" onclick="this.style.visibility='hidden'">
<table border="1" style="width:100%;background:#efefef">
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
<tr><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td><td>&nbsp</td></tr>
</table>
</div>

</body>
</html>
```

5. De creat o pagină Web cu trei inscripții, atunci cînd este apăsat unul din acestea, se va face vizibil stratul corespunzător(*vezi imaginea*).

```html
<html>
<head>
<title>css lucrare 5</title>
<style>
div {
		position:absolute;
		left:200;
		top:20;
		visibility:hidden;
}
span {
		cursor:pointer;
}
</style>
<script>
function show(num)
{
		var v = "visible";
		var h = "hidden";
		// arata stratul selectat și ascunde restul
		text1.style.visibility = num == 1 ? v : h;
		text2.style.visibility = num == 2 ? v : h;
		text3.style.visibility = num == 3 ? v : h;
		v = "red";
		h = "black"
		// selectam textul
		btn1.style.color = num == 1 ? v : h;
		btn2.style.color = num == 2 ? v : h;
		btn3.style.color = num == 3 ? v : h;
}
</script>
</head>
<body>
<span id="btn1" onclick="show(1)">
arată strat 1
</span>
<br>
<span id="btn2" onclick="show(2)">
arată strat 2
</span>
<br>
<span id="btn3" onclick="show(3)">
arată strat 3
</span>
<br>
<!-- straturi cu text -->
<div id="text1">
Strat 1
</div>
<div id="text2">
Strat 2
</div>
<div id="text3">
Strat 3
</div>
<script>
// Implicit  afisam strat 1
		show(1);
</script>

</body>
</html>
```
